Best Practices When Designing Your ZAP

The solid black trim line shows the finished size of the document. The final size of the letter after printing and trimming is 8.5" x 11.00" and there is NO BLEED on API Letters. There is a 8.25" x 10.75" safe zone around the document inner edge - this area can contain images only, so text and important information should not exceed this area.

The shaded area 'Address Window' is a no print zone. Keep this area free of text and images.
